

Whole House Water Filtration System Rebate Program

In response to customer complaints of brown-tinged or turbid water, San Juan River Village Metro District is offering a rebate program for the installation of a **WHOLE HOUSE** water filtration system. The District recommends that homeowners with discolored water concerns install a filter specifically for the removal of suspended Iron and Manganese. Lab tests have shown that both Iron and Manganese levels found within the water system are below the maximum contaminant levels and pose no health concern, yet the coloring of the water is aesthetically unpleasing. SJRV Metro will reimburse homeowners up to \$200 through this filter rebate program. This is the quickest way for homeowners to take corrective action.

Download the [SJRV Filter Rebate Form](#) to apply for the rebate. All rebate requests must be approved by the board.
