

Cell Tower on Metro Property?

The Metro District has been approached by Vertical Bridge to purchase an easement to install a cell tower on Metro property. To summarize the proposal: Vertical Bridge is partnering with Verizon Wireless to increase cell coverage in the area of San Juan River Village. Vertical Bridge is proposing an 80' monopole or monopine (looks like a tree) with a compound footprint no larger than 100' x 100' located at 598 Alpine Drive. Verizon will be the anchor tenant for this structure, with the intention of allowing other carriers to add their own equipment in the future.

The proposed site is shown below with a blue box on the far side of the sewer lagoons along Hwy 160:

If you have questions or comments about this proposal, please contact me at: cynthia.sjrvmd@gmail.com or attend a future Metro District meeting – the second Thursday of each month at 6:00pm. The meetings are held at the maintenance building at 598 Alpine Dr. Information can be found on our website at: www.sanjuanrivervillage.com

Thank you,

Cynthia Purcell
SJRV Metro District Manager
